GEOHERMAL ENERGY

Independent and sustainable Project Management

Certified products according to API 5CT standard

Meeting your special requirements

GEOHERMAL PROJECTS

Full-service solutions from a single source

The BUHLMANN Group is an international trading house for steel pipes, tubes, fittings, and accessories. The highest product quality standards and global customer service are among the Group's core competencies. As a sustainable company, we endeavor to reduce the emissions from our process chains in the long term and use renewable energies and natural resources as efficiently as possible.

With over 75 years of experience in the steel industry we support you with customized solutions for your geothermal projects. Precisely tailored to your requirements, we offer all API standard and special dimensions (certified to API 5CT standard). Let your project benefit from our expertise in planning and consulting – from the budget phase to project realization.

Competencies:

- On-site support from field service specialists
- Cooperation with recognized test laboratories
- API Monogram certified manufacturers
- 136,000 m² of storage space with a capacity of over 65,000 tons
- Development and implementation of logistics and storage concepts
- Storage of materials in accordance with API RP 5 C1 requirements
- Broad European network of license holders for threads
